Upgrade Your System To A Powerful 6x86 P120+ For Only $355

What is a 6x86? We get asked this question a lot. Since this is our most popular PC upgrade, we answer this question a lot, too. You've probably heard of a company called Intel. They manufacture the most popular PC processor made today: the Pentium. Their primary competitor is a company called Cyrix. They took a Pentium chip and found out how to make it faster, more efficient, and yet less expensive. It's a better product. You probably haven't heard of it because Cyrix doesn't spend quite as much as Intel does on advertising, but we have been using Cyrix chips for *years* and have done *hundreds* of upgrades with their chips, and they run great. Anyhow, we can take your old 486 or Pentium system and upgrade it to a **6x86 P120+** processor with a new PCI motherboard for only **$355**. What does this include? Well, it includes pick-up of your computer (Buffalo & local suburban area only), the new motherboard and processor, the upgrade service, and return delivery of your system within 3 to 5 business days. We can also upgrade you to a **6x86 P166+** for only **$68** more. Great deal, huh? If you would like to learn more about this upgrade special, and learn a little more about what the 6x86 processor can do for you, call and request document **#702210.** We've put together a special report just on this subject. Again, we have done literally hundreds of upgrades since we first started offering this special last September. If you're looking for more speed out of your computer, we're the ones to call.

Visit Us Online

If you have a modem, and you have Internet access, visit our Web site at

www.amicron.com

for more information on any of our interesting products and services. Our WebMaster (Jason) has been making some really wonderful modifications to the site, and we've been adding all of our *ComputerFAQs* and *AmicroNews* issues to the site so that you can view them online. Soon, we'll even have document request info online. Now, if you don't have Internet access, and would like to get online, request document **#702214.**

When Was The Last Time Your Computer Had An Oil Change?

Well, of course computers don't actually use oil, but just like automobiles, computers are sophisticated machines that do require regular *professional* preventative maintenance. We have a service *just* for that purpose - and we recommend it to all of our customers at least once a year. It's called *PCDoctor*. First, we take your computer apart and give the case and power-supply a good physical cleaning. Dust that builds up inside a computer case can cause heat build-up which is very bad. Next, we perform a series of hardware and software diagnostics to make sure everything in your computer is running OK and is virus-free. Problems that are caught in their early stages are *much* easier to fix - and much less costly. Finally, we optimize your system and fine tune it so it is running at peak performance. If you would like more information on our service, and how it can benefit your company (it pays for itself in saved repair costs), then call and request document **#702216**.

Your Data On CD-ROM

CD-ROM storage is permanent, portable, and inexpensive. CD-ROM storage has a 100+ year shelf life, and most computers sold today contain CD-ROM drives. Put your data on CD-ROM quickly and inexpensively. Request document **#702213.**

Learn How To Use Your Computer

Our *Executive Training Center* offers training in everything from Microsoft Excel to WordPerfect. Spend a little time now to save a lot of time later. Learning how to *properly* use your computer software can save you hours of frustration at work. We can help make your more productive. For a class schedule, please call and request document **#702215**.

Network Your Office

We are specialists with Microsoft Windows NT, Windows 95, Windows For Workgroups, and Novell Netware networks. If you would like more information on networking your office computers together, call and receive our special report on networking and how it can help your business. Call us at 716-837-4685 and request document **#702212.**

Business And Home
COMPUTERS
