April 97 Schedule For The Executive Training Center Is Now Available!

The complete schedule for open-enrollment classes in our *Executive Training Center* has been released. If you would like to learn more about Microsoft Office, WordPerfect, the Internet, DOS, Windows, Windows 95, Windows NT, or just need a few basic computer lessons, we have the help you need. To receive a schedule and pricing, please call us at **716-837-4685** and request document **#703191**. We have classes available for everyone - individuals and corporate customers as well. We also offer on-site training. Call for more information or a course outline.

Information Is Key

In business, information is money. You need to be able to share information across your office, and across the world. We are specialists with Microsoft Windows NT, Windows 95, Windows For Workgroups, and Novell Netware networks. We can also help plug your business into the Internet. If you would like more information on networking your office computers together, or connecting them to the rest of the world, call and receive our special report on networking and how it can help your business. Call us at 716-837-4685 and request document **#703192**.

Software Picks Of The Month

This month's software picks of the month are *Partition Magic* (\$59): a program which allows you to run multiple operating systems (DOS/Win, Win95, and WinNT, for example) on your machine at the same time; *Microsoft Office Pro 97* (\$299): Microsoft's latest release of their popular Office applications and some new goodies; *TurboTax* (\$29) and *TurboTax For Business* (\$59): hey, if you haven't done 'em yet, it's about time! And *Symantec pcAnywhere 32* (\$79): the best software available for remote PC control. All Picks

of the Month are subject to stock availability (no rain checks). Request document **#703193** for details.

When Was The Last Time Your Computer Had An Oil Change?

Well, of course computers don't actually use oil, but just like automobiles, computers are sophisticated machines that do require regular *professional* preventative maintenance. We have a service *just* for that purpose - and we recommend it to all of our customers at least once a year. It's called *PCDoctor*. First, we take your computer apart and give the case and power-supply a good physical cleaning. Dust that builds up inside a computer case can cause heat build-up which is very bad. Next, we perform a series of hardware and software diagnostics to make sure everything in your computer is running OK and is virus-free. Problems that are caught in their early stages are *much* easier to fix - and much less costly. Finally, we optimize your system and fine tune it so it is running at peak performance. If you would like more information on our service, and how it can benefit your company (it pays for itself in saved repair costs), then call and request document **#703194**.

Your Data On CD-ROM

CD-ROM storage is permanent, portable, and inexpensive. CD-ROM storage has a 100+ year shelf life, and most computers sold today contain CD-ROM drives. Put your data on CD-ROM quickly and inexpensively. Request document **#703195**.

Upgrade Your Computer

If you have a 486 PC and would like to get a little more speed - or even a *lot* more speed out of your machine, you can save money by *upgrading* your system rather than purchasing a whole new computer. Here's how it works: we take your existing computer apart, pull out the motherboard (that big circuit board that everything else plugs into) and put a new, fast P120+, P166+, or P200+ motherboard into it, and you now have a *blazing fast* system starting

Please call for more information on any of our products or services. If you would like to request a document, please call 716-837-4685 and give the number of the document you are requesting. Missing back issues? Check our Internet site, or call and request the issues you would like to receive. If you would like to be removed from our fax database, please call or fax us and be sure to leave us your fax number for prompt attention. Thank you. We look forward to serving you.

at around \$355. We can also upgrade your memory, hard drive capacity, and add peripherals like a CD-ROM drive or modem. If you would like more information on our upgrade specials, please call and request document **#703196**.

Complete P200+ System Only \$1699

Our "March Special" system is a P200+ powerhouse with 16 MB of RAM, a 1.7 GB hard drive, 12X CD-ROM, 16-bit sound card, speakers, 33.6 data/fax modem, 2 MB PCI video, 1.44 MB floppy, mini-tower case, keyboard, mouse, a 14" SVGA monitor, Windows 95 SR2, and our Silver PC Service Package that comes with free delivery and installation and our lifetime technical support guarantee. For only \$1699, that's a great deal - and it's not a "cheap" system by any means. We use only the finest components, and we custom-build and test each and every system. Now, if this PC is not to your liking, please give us a call. We have several of our more popular configurations that we can fax over to you, or if you'd like a custom-quoted system, we can provide you with whatever you're looking for.

Amicron Alpha: 486 DX4/100, 8 MB RAM, 1.2 GB HD, only \$716. Our office PC on a budget.

Amicron Beta: P120+, 16 MB RAM, 1.6 GB HD, 8X CD, only \$1219. Our mid-range office PC.

Amicron Delta: P166+, 32 MB RAM, 3.1 GB HD, 12X CD, 33.6 modem. Only \$1769. Our PC for serious users.

Amicron Gamma: P200+, 64 MB RAM, 4.0 GB HD, 12X CD, 33.6 modem, Windows NT. The ultimate office PC for \$2903. It's a little more expensive, but this machine's worth every cent.

Call today and request document **#703197** for information on our March Special or any of our complete systems.

WWW Anyone?

As if we didn't have enough to do already, we are now offering WWW home-page development. If you are in need of a home page for your business, call and request document **#703198** or visit our home page at www.amicron.com.
